

INSTALLATION INSTRUCTIONS

#800029 – ECONOMY TRANSFER CASE SPACER – JEEP YJ & TJ

Please read instructions before beginning installation. Check the kit hardware against the parts list. Be sure you have all needed parts and know where they go.

1. Support the transfer case skid plate. The transmission and transfer case are supported by the skid plate. Before removing the skid plate ensure that the transmission is properly supported.
2. Remove the six (6) bolts connecting the skid plate to the frame. Reinstall the transfer case skid plate with supplied transfer case spacers, conical washers, washers, and bolts as shown in illustration. Torque bolts to 55 ft./lbs.

MAINTENANCE INFORMATION

It is the ultimate buyers responsibility to have all bolts/nuts checked for tightness after the first 100 miles. After that, check them every 1000 miles. Wheel alignment steering system, suspension and drive line systems must be inspected by a qualified professional mechanic at least every 3000 miles.
